

PRIVACY POLICY

This privacy policy governs your use of the software application Who Owes Me (“app”) for mobile devices that was created by Voglhuber. The software is a small app, which will generate a unique identifier and save it on a server. There are no personal information of the users, which are saved. Only exception is when you activate the Cloud Sync feature. That way you can sync your data between multiple devices. Your e-mail address is used as your username. And if you use the Cloud Sync feature you accept that your data is saved on an server, so it can be synced between your devices.

What information does the app obtain and how is it used?

Automatically Collected Information

In addition, the app may collect certain information automatically, including, but not limited to, the type of mobile device you use, parts of the IP address of your mobile device, your mobile operating system, the version of the app you use, and information about the way you use the app.

Does the app collect precise real time location information of the device?

This app does not collect precise information about the location of your mobile device.

Is the information obtained by the app shared with any third parties?

The data is not shared with any third parties.

Access to your contacts

You can grant the app the right to access your contacts. The app does NOT automatically read any data of your contacts. It only uses the first and last name of a contact you individually select in an contact picker, which is provided by iOS. We don’t save any information if the name of a friend was from an selected contact or was entered manually by the user. We don’t automatically save your contacts to any server. If you use the cloud sync feature the name of your selected contacts (as all information which is entered into the app) is uploaded to the sync server to keep all your devices updated. If you want to make sure the app does not access your contacts, deny the permission when the app asks for it in an alert before using the contact feature.

Access to your images

You can choose an image from your library as folder image. This image is synchronized if you use the Cloud sync service. We only have access to the image you choose. You can remove the image from our server by deleting the folder or choosing a different image, such as one of the default images.

What are my opt-out rights?

You can stop all collection of information by the app easily by uninstalling the app. You may use the standard uninstall processes as may be available as part of your mobile device or via the mobile application marketplace or network. If you used the Cloud Sync feature, you should delete all your data inside the app before deleting it.

Your Consent

By using the app, you are consenting to our processing of your information as set forth in this Privacy Policy now and as amended by us.

Questions

If you have any questions use the contact form in the app settings.
